

# NET ZERO 2021

## SEPTEMBER 13-16 | VIRTUAL + LOS ANGELES

The Net Zero 2021 Conference (NZ21) is an international conference dedicated to net zero, decarbonization, and resilience. It will be presented both virtually (September 13 – 15) and in-person in Los Angeles (September 16).

- NZ21 will feature new trends and technologies to help your company stay ahead of the sustainability curve.
- This year, the Net Zero Conference is expanding beyond buildings, energy, water, waste, and transit, to encompass agriculture, fashion, materials, personal care, and technology.
- Attendees will be able to choose one of these tracks or mix-and-match between topics based on their personal interests. Attendees can plan their schedules so that they are attending the education sessions that are most relevant to their line of work, while also having the opportunity to branch out and find inspiration in other sectors.
- In addition to providing cutting-edge education, the event is a great networking opportunity. Attendees will have the opportunity to connect with sustainability professionals from across the world, generating leads for new business.
- Verdical Group's new Climate+Change platform, a hub for sustainability news and events, will be launched at the event on September 13.
- The Expo Hall will feature leading exhibitors, including manufacturers, architects, engineers, building owners, nonprofits, and other organizations that are on the ground making net zero projects a reality. Here, you will be able to discover new products, potential partners, and customers that could lead to new business. This ideas-sharing environment is an ideal place to connect.
- Hear from our slate of incredible Keynotes – like Marcius Extavour of XPRIZE and Ashley Orgain of Seventh Generation -- pioneers in advancing sustainability within their industries.
- Case studies are key in the net zero conversation. By attending this event, attendees will discover which techniques have been successful for peers in solving the issues your team is facing.
- NZ21 is a professional development opportunity for employees and a business development opportunity for your organization. Make your company a part of the conversation at this event, which is at the forefront of innovation in sustainable thought leadership.
